

### [Freckleton Veterinary Clinic and Aquazone.](#)

Ana Sedecaru is delighted to be able to offer the services below in our purpose built clinic. Ana will be assessing the needs of each patient individually then tailoring a specific plan to the patients needs. Below is an outline of the type of services she will be offering but feel free to call on [01744 453429](tel:01744453429) for further help.

### [Hydrotherapy](#)

Our state of the art water treadmill enables us to offer the ability to help a number of ailments without putting pressure on the affected area, to include; postoperative rehabilitation, arthritis, improvement of muscular strength and weight loss

### [Physiotherapy](#)

Massage, hot/cold therapies, stretching, exercise plans and TENS machine stimulation are all part of the individual plans that will be bespoke to the patient.

### [Rehabilitation](#)

Bespoke rehabilitation plans will be used that will offer a combination of various treatments individual to the patients needs.

### [Pain clinic](#)

Various techniques will be utilised to help alleviate and manage both chronic & acute pain. Pain management programmes may include the use of the water treadmill, physiotherapy, TENS therapy & acupuncture.

### [Weight loss programme](#)

A plan will be put together with the client that is manageable by the client to include, diet, physiotherapy, water treadmill and lifestyle changes.

### [Wellness and conditioning](#)

Specifically designed with the working dog in mind, this service will offer services including all of those above but with the working dogs needs in mind.

### [Acupuncture](#)

Can be used for a variety of cases such as; chronic pain management, arthritis, lick granulomas and urinary incontinence.
